

Grant Final Report:

Employee Transport Safety Initiative

Our goals for this grant were to decrease employee injury during transport and transfer of patients, increase patient satisfaction and care by decreasing and eliminating our patients falls during transport and transfer, and decrease staff productivity requirements. With the purchase of the transport stretchers and Hoyer lift, all goals were met as evidenced by no employee or patient injuries this past year. Thank you again for providing the funds that allowed Crenshaw Community Hospital to purchase this equipment that has increased both employee and patient safety.
